

## The Spelling Lab Lesson 31-60 Pre-Assessment Word List

Use the following list to determine if your student has already mastered the concepts that will be taught in lessons 31-60. Pronounce the words clearly and repeat them as needed, but do not provide any assistance with sounding out or spelling.

If your student misses 5 or more words from this list, lessons 31-60 would be beneficial for their spelling mastery. Take the pre-assessment for lessons 1-30 as well to see if those lessons would be beneficial, too.

Lessons 1-30 also teach short and long vowels, digraphs, diphthongs, combinations, diacritical coding, syllable division, and accent concepts that are pertinent to spelling, so if your student is not familiar with those concepts, they would still benefit from building those skills in lessons 1-30 before lessons 31-75.
